- All-around geek

Skills

- WordPress Themes
- WordPress Plugins
- WooCommerce
- Joomla Templates
- PHP
- CSS
- HTML

Work Experience

JAN 2010 – PRESENT

WordPress/Web Developer / Drake Creative Collaborative

Responsible for programming client sites in WordPress and other web platforms including Joomla. Responsibilities include picking proper plugins for project, designing and coding custom post types and taxonomies, and implementation of API calls. Implemented centralized management of updates for plugins and core WordPress versions via MainWP. Also responsible for managing web hosting server via CPanel and webspace for clients on various web hosts.

AUG 2004 – PRESENT

WordPress/Web Developer/Owner / Solo Web Designs

Freelance web development with an emphasis on WordPress. Responsible for programming client sites in WordPress and other web platforms. Responsibilities include picking proper plugins, scripts, and templates for project. Also responsible for managing web hosting servers and webspace for clients on various web hosts.

Selected Work

Client: Drake Creative Collaborative

[HTTPS://DRAKECREATIVECOLLAB.COM](https://drakecreativecollab.com)

Portfolio for current employer. Implemented lazy loading of images, image zoom animations, and portfolio categorization utilizing custom post types and taxonomies. Other samples of my work can be found here.

Client: The Art Effect

[HTTPS://THEARTEFFECT.ORG](https://thearteffect.org)

Gutenberg used extensively throughout the build, including reusable blocks/block templates to ease client use of site, class section powered by API calls to external site populating a custom post type with custom taxonomies.

Client: Greg Cimms Knives

[HTTPS://GCKNIVES.COM](https://gcknives.com)

WooCommerce shop built to sell custom knives. Selected and implemented plugins to fit client's needs.

Client: Alisa Kwitney

[HTTPS://ALISAKWITNEY.COM](https://alisakwitney.com)

Blog with custom post type for author's books.

Client: Hudson Valley Fresh

[HTTPS://HUDSONVALLEYFRESH.COM/](https://hudsonvalleyfresh.com/)

Informational website for small dairy collective. Full-screen video, Google Maps based product finder. Implemented shaped image slider with info for each farm in the collective.

Selected Personal Projects

Project: WordPress Configurable Tag Cloud Plugin

[HTTPS://WORDPRESS.ORG/PLUGINS/CONFIGURABLE-TAG-CLOUD-WIDGET/](https://wordpress.org/plugins/configurable-tag-cloud-widget/)

Tag cloud plugin for WordPress. Includes options for scaling font size and color based on tag usage counts. Over 100,000 downloads from the WordPress plugins library.

Project: Solo-Frame WordPress Theme Boilerplate

[HTTPS://GITHUB.COM/KSOLOMON/SOLO-FRAME](https://github.com/ksolomon/solo-frame)

Boilerplate/framework for custom WordPress themes. Includes lots of little helpful functions, such as page titles, theme options, floating copyright date, and more. Responsive, flexbox build.

Project: Home Lab

My personal development and server playground. Incorporates a variety of hardware and software, ranging from an enterprise-grade Dell R410 server to a Lenovo ThinkStation workstation running Proxmox, hosting a variety of Linux-based virtual machines and containers.

Project: Starbound Game Server

Game server for my son and his friends to play Starbound. Runs under Linux on a SuperMicro rackmount server.
